

Motivational Interviewing for Healthcare Professionals Online Education

Develop an in-depth understanding of **motivational interviewing** as an evidence-based approach to support client **health behavior changes**.

Now featuring:

Motivational Interviewing for Primary Care: Opioid Abuse/Misuse!

Why Attend?

This online education will provide **health care professionals** with:

- Skill in recognizing patients' readiness, by responding effectively to both sides of the patient's ambivalence and supporting motivation for change to improve health outcomes.
- Participatory learning experiences, self-paced modules, videos and practice exercises to prepare participants to use MI in patient encounters with diverse populations and settings.
- Access to an interactive health behavior change website for follow-up networking and peer support.

Target Audience

All health care professionals who work directly with patients on issues related to health behavior change, health promotion, or chronic disease management.

Continuing Education: Please see website for CE information.

Don't miss this opportunity to join your colleagues in this unique program!
